Overview

This report summarizes the ICE detention facility data assembled by the `targets` pipeline, covering 16 fiscal years of data. The pipeline tracks facilities across multiple data sources and assigns each a canonical identifier.

▸ Code

ID range	Facilities
DDP other (1054–1203)	156
DMCP-only (1001–1053)	53
ERO offices (2001–2025)	25
Hold facilities (2026–2186)	155
Medical (3001–3226)	226
FY panel (1–398)	347

The pipeline contains **962** canonical facilities in total. Of these, **347** appear in the FY annual statistics panel (FY10–FY26, minus FY18).

Active vs. closed (panel facilities)

▸ Code

Trajectory	Facilities
new	147
closed	85
transient	81
continuous	39
persistent_gaps	38

In FY26, **224** panel facilities were active.

Facility types

▸ Code

Type	Facilities	Share
Jail/Prison	159	70.7%
Dedicated Migrant Detention Center	23	10.2%
Private Migrant Detention Center	22	9.8%
Federal Prison	7	3.1%

ICE Migrant Detention Center	5	2.2%
ICE Short-Term Migrant Detention Center	5	2.2%
State Migrant Detention Center	2	0.9%
Family Detention Center	1	0.4%
Military Detention Center	1	0.4%

Source coverage

The pipeline draws on five data sources. The table below shows how many canonical facilities appear in each.

▸ Code

Source	Facilities	Share
FY annual stats	390	40.5%
DMCP 2015 (faclist15)	206	21.4%
DMCP 2017 (faclist17)	200	20.8%
DDP daily population	847	88.0%
Marshall Project	449	46.7%
Vera Institute	941	97.8%

Supplementary coverage

▸ Code

Attribute	Facilities	Share
Has DETLOC code	561	58.3%
Is geocoded	962	100.0%

Geocode sources

The pipeline assembles geocoded coordinates from three sources: Google Maps API (panel and ERO facilities), The Marshall Project (hold rooms with known addresses), and the Vera Institute (backfill for hold rooms without Marshall coverage).

▸ Code

Geocode source	Facilities	Share
google_maps+vera_institute	675	70.2%
google_maps+marshall_project	93	9.7%
preference:google_maps	77	8.0%
preference:vera_institute	34	3.5%
auto:google_maps+vera_institute	32	3.3%
google_maps	20	2.1%
divergent	9	0.9%
vera_institute	7	0.7%
preference:marshall_project	6	0.6%
auto:google_maps+marshall_project	5	0.5%
NA	3	0.3%
preference:manual	1	0.1%

Vera Institute coverage

▸ Code

Vera facility type	Facilities	Share
Non-Dedicated	280	30.4%
Medical	276	29.9%

Other/Unknown	142	15.4%
Federal	116	12.6%
Hotel	51	5.5%
Family/Youth	30	3.3%
Hold/Staging	19	2.1%
Dedicated	8	0.9%

The Vera Institute facility list contains **1464** distinct facility codes, of which **559** match a canonical facility DETLOC. The remaining **905** Vera codes are not in the canonical dataset. These are predominantly jails and county facilities used for short-term detention ("Non-Dedicated"), medical facilities, and federal prisons not tracked in the ICE annual statistics.

Source overlap analysis

The pipeline draws on four broad data source families. This section consolidates the two ICE-published sources (FY19–26 annual statistics and FY10–17 DMCP summary listings) into a single "ICE" category and compares overlap with DDP, Vera Institute, and Marshall Project.

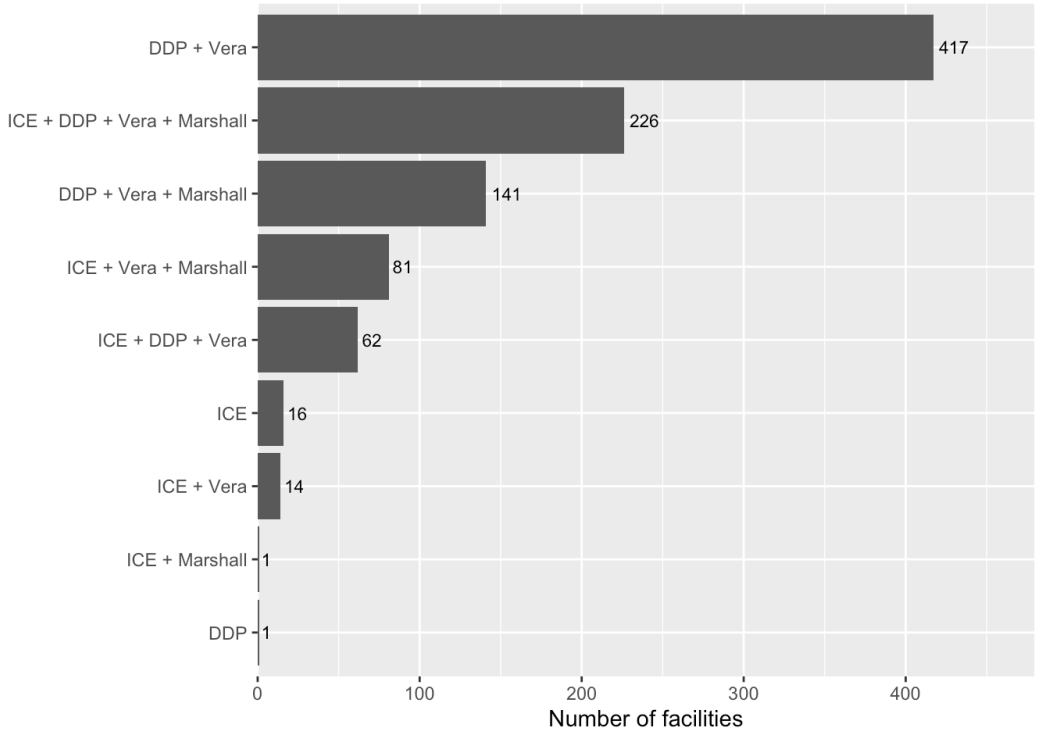

Figure 5: Facility counts by source combination

226 facilities (23.5%) appear in all four source families. **141** appear in DDP + Vera + Marshall but not any ICE-published source — these are primarily hold rooms and staging facilities that ICE does not include in its published statistics. **16** facilities appear only in ICE-published data with no external corroboration; these are mostly closed or short-lived sites with no DETLOC code.

Coverage gaps

Panel facilities (IDs 1–398) with limited source coverage:
